Developer Document

Student name: Viktor Kim
Student number: 1144136
Project: Portfolio Website

17.10.2023
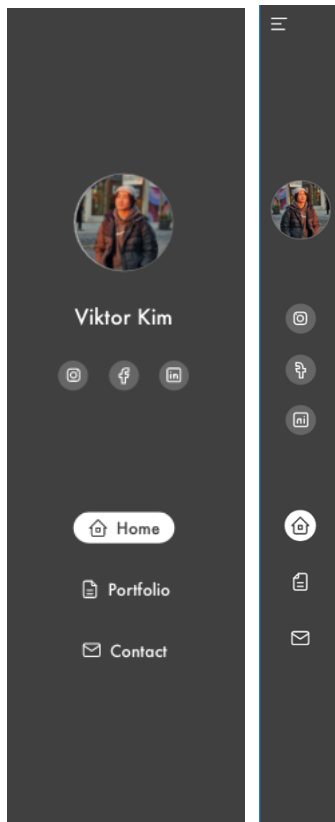

Technologies to be used:

HTML
CSS
SASS
JavaScript
GreenSock

Navigation on the website

On my website, I decided to create a sidebar to easily and quickly move from one section to another

**Below you can observe how the sidebar will look like for desktop and mobile**

By design, the sidebar will have to move along the entire page downward while scrolling.

Portfolio Page

The portfolio section will showcase all my best projects. The project window will bounce and be highlighted in a different color when you hover over it. If you click on it, a lightbox will open with more detailed information about the project, images, used software and other interesting information.
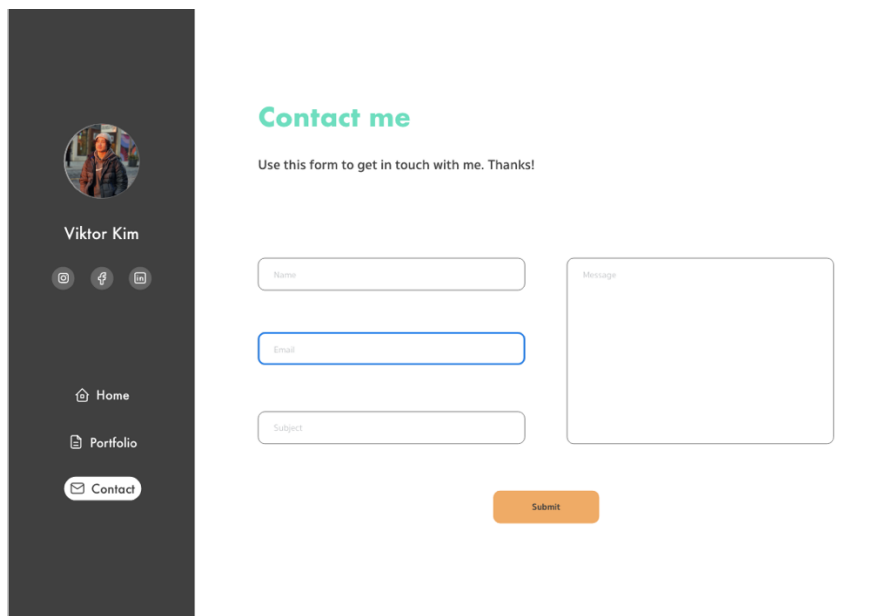

Portfolio

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less.

Project 1
